Salmon Arm
economic development society

Manufacturing Muscle

Salmon Arm's Industrial Park is home to world class design, engineering and manufacturing firms, but we've never lost our neighbourhood approach to getting things done. Now with dozens of thriving state of the art operations and hundreds of thousands of hours of specialized experience, our industrial park community has fostered a true team work approach relying on one another's skill sets to deliver winning solutions. Salmon Arm offers everything you need to add muscle to your industrial operation including a diverse economic climate and consistent growth trends creating an expanse of industrial opportunities.

What's more, Salmon Arm's Industrial Park has its own airport as well as direct access to the Trans Canada Highway. The Okanagan College Trades Training facility is steps away providing access to a highly skilled labour pool.

But it's far from all work and no play. With Shuswap Lake moments away from the shop door and loads of outdoor recreation to enjoy, there's plenty to do to rest up for the next big project. We offer the perfect balance between industrial opportunities and a fabulous quality of life.

Proximity to Market

Conveniently located on the TransCanada Highway midway between Vancouver and Calgary. Close proximity to the Kelowna International Airport, CP Rail Intermodal facilities and the Port of Vancouver.

Industrial Land

Salmon Arm offers a variety of serviced industrial properties for sale or for lease at competitive prices much below neighbouring urban centres.

Diverse Sustainable Economy

Salmon Arm hosts a well-balanced diversity of employment and skills, such as manufacturing, construction, agriculture, forestry, tourism, technology, retail, and professional services.
